BUT1 Electrical Engineering and Industrial Computing

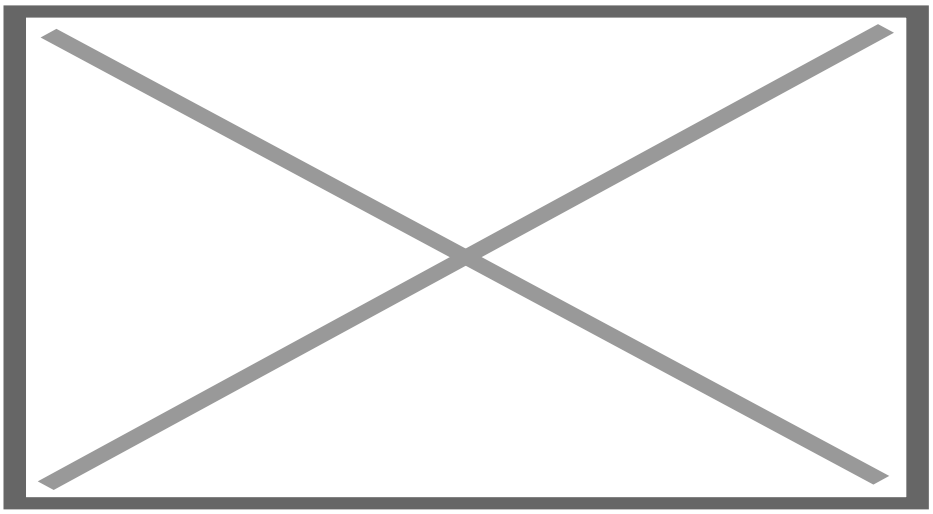

BUT (University technology degree)
Specialisation Génie électrique et informatique industrielle
Enrolment type
Formation initiale
Contrat de professionnalisation
Formation en apprentissage
Formation continue
Language(s) of instruction
German
English
Spanish
French

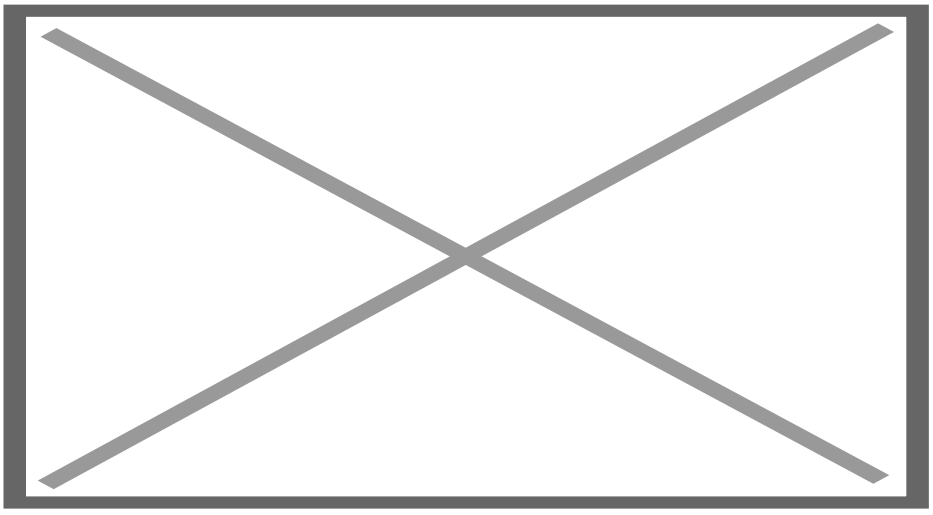

With a focus on innovation and technological development, the University technology degree (BUT) in Electrical Engineering and Industrial Computing is a three-year programme that trains students for the world of tomorrow. It allows students to develop competencies to work in the sectors of the city and industry of the future, smart and connected networks, transport and electromobility, aeronautics, renewable energies, healthcare, audiovisual, robotics, space, and more.

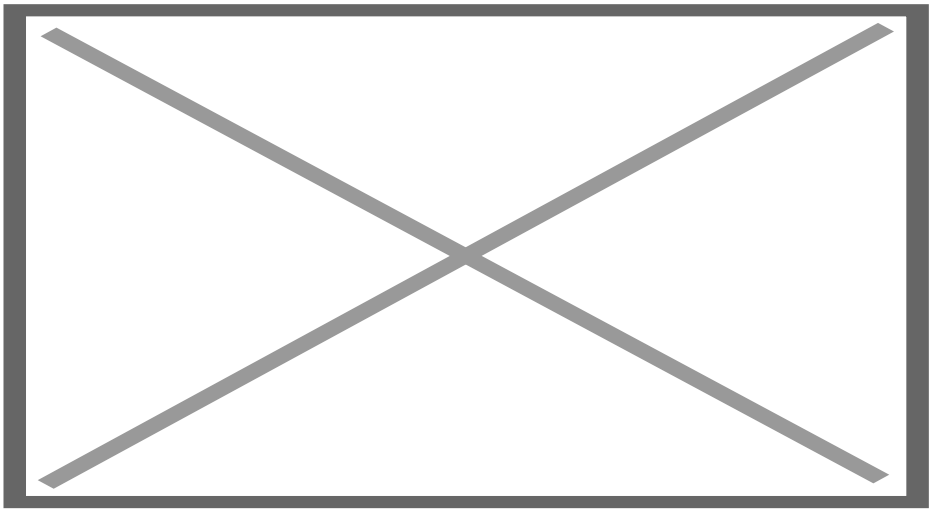

- A curriculum with an excellent support framework: 2000h of courses over 3 years. - A technical curriculum with a strong focus on practice and projects: + 600h of supervised projects over 3 years; + practical work in groups of 12/13 students; + supervised work in groups of 24/26 students; + 22 to 26 weeks of internship, in France or abroad. + Work-study programme available from the 1st year. + Continuous, competencies-based assessment. + Always possible to graduate at Bac+2 with a university technology diploma (DUT). The University technical institute (IUT) at Cachan offers three university technology diploma (BUT) courses in Electrical Engineering and Industrial Computing : - Electricity and Energy Management (EME)) , - Automation & Industrial IT (AII) - Electronics and Embedded Systems (ESE) The choice of course is made at the end of the 1st year.

Présentation

Skills

Students completing the university technology diploma in Electrical Engineering and Industrial Computing (BUT GEII) will be able to design and implement systems for processing and sending information, and managing and exploiting energy. + Strong scientific and technical culture. + Ability to communicate through various media. + Fluency in technical English. + Knowledge of the professional world. + Autonomy, initiative, team spirit.

Objectives

The Department of Electrical Engineering and Industrial Computing (GEII) offers a curriculum geared towards careers in electricity and electronics (electronics, computing, networks and electricity). The aim is to prepare students in 3 years for senior technician roles, while offering the possibility of further study, particularly through work-study programmes.

Débouchés

Further Study Opportunities

Master of Education and Teaching Professions
Engineering school
Engineering, research and development
Master’s Degree in Engineering or Mechanical Engineering

Target Audience and Entry Requirements

The BUT is a 3-year university technology diploma that forms part of the European LMD system. A selective field of study, it is open to secondary-school students with scientific or technological baccalaureate degrees, and to students re-orienting their studies (L1, CPGE (Preparatory Classes for the Grandes Écoles), STS (Higher Technician Sections), university technology diploma (DUT), PACES (First Year of the Joint Health Studies Programme), etc.). The BUT is also open to continuing education and RPL students.
