

# EUROPEAN DIPLOMA OF FERTILITY PRESERVATION

Pr Philippe MORICE  
Pr Michael GRYNBERG

## MODULE A / INTRODUCTION

|                                                                                 |            |                   |                      |
|---------------------------------------------------------------------------------|------------|-------------------|----------------------|
| History of fertility preservation                                               | 01/10/2026 | 18 h 00 - 19 h 00 | Jacques Donneze      |
| Impact of chemotherapy on the ovarian function                                  |            | 19 h 00 - 20 h 00 | Richard Anderson     |
| Impact of targeted therapies on the ovarian function                            | 06/10/2026 | 18 h 00 - 19 h 00 | Patricia Pautier     |
| Interpretation of a semen analysis                                              |            | 19 h 00 - 20 h 00 | Marcos Meseguer      |
| Impact of chemotherapy on testicular function                                   | 08/10/2026 | 18 h 00 - 19 h 00 | Jan Bernd Stukenborg |
| Fertility after childhood and adolescent cancer                                 |            | 19 h 00 - 20 h 00 | Hamish Wallace       |
| Folliculogenesis                                                                | 13/10/2026 | 18 h 00 - 19 h 00 | Frank Brookmans      |
| Impact of radiation therapy on male fertility                                   |            | 19 h 00 - 20 h 00 | Francesca de Felice  |
| Radiation therapy and female fertility                                          | 15/10/2026 | 18 h 00 - 19 h 00 | Cyrus Chagari        |
| Infertility: epidemiologic aspects                                              |            | 19 h 00 - 20 h 00 | CM Cox               |
| Spermatogenesis                                                                 | 20/10/2026 | 18 h 00 - 19 h 00 | Calista Mulder       |
| Assessment of the ovarian function and impact on fertility and its preservation |            | 19 h 00 - 20 h 00 | Antonio La Marca     |

## MODULE B / FEMALE FERTILITY PRESERVATION

|                                                                                   |            |                   |                         |
|-----------------------------------------------------------------------------------|------------|-------------------|-------------------------|
| Oocyte vitrification                                                              | 29/10/2026 | 18 h 00 - 19 h 00 | Ana Cobo                |
| Embryo vitrification for fertility preservation                                   |            | 19 h 00 - 20 h 00 | Laura Rienzi            |
| Ovarian tissue cryopreservation from the lab                                      | 03/11/2026 | 18 h 00 - 19 h 00 | Claus Yding Andersen    |
| GnRH agonist for fertility preservation                                           |            | 19 h 00 - 20 h 00 | Anna Marklung           |
| Ovarian stimulation for fertility preservation: general considerations and safety | 05/11/2026 | 18 h 00 - 19 h 00 | Christophe Blockeel     |
| Dual stimulation for fertility preservation                                       |            | 19 h 00 - 20 h 00 | Filipo Ubladi           |
| Random start for fertility preservation                                           | 10/11/2026 | 18 h 00 - 19 h 00 | Ozgur Oktay             |
| Letrozole during ovarian stimulation                                              |            | 19 h 00 - 20 h 00 | Kutluk Oktay            |
| Anti estrogen therapy during ovarian stimulation                                  | 12/11/2026 | 18 h 00 - 19 h 00 | Moran Shapira           |
| Progesterone primed ovarian stimulation                                           |            | 19 h 00 - 20 h 00 | Ernesto Bosh            |
| Ovarian tissue transplantation: technical aspects , results, safety               | 17/11/2026 | 18 h 00 - 19 h 00 | Marie Madeleine Dolmans |
| Regulatory mechanisms in human in vitro maturation                                |            | 19 h 00 - 20 h 00 | RG Chian                |
| In vitro maturation for fertility preservation                                    | 19/11/2026 | 18 h 00 - 19 h 00 | Michel de Vos           |
| Uterus transplantation                                                            |            | 19 h 00 - 20 h 00 | Mats Branström          |
| Ovarian transposition                                                             | 24/11/2026 | 18 h 00 - 19 h 00 | Aljosa Mandic           |
| Uterus transposition                                                              |            | 19 h 00 - 20 h 00 | Sebastien Gouy          |
| In vitro folliculogenesis                                                         | 26/11/2026 | 18 h 00 - 19 h 00 | Evelyn Telfer           |

## MODULE C / MALE FERTILITY PRESERVATION

|                                                     |            |                   |                  |
|-----------------------------------------------------|------------|-------------------|------------------|
| Sperm cryopreservation for fertility preservation   | 05/01/2027 | 18 h 00 - 19 h 00 | Michael Rimmer   |
| Onco TESE                                           |            | 19 h 00 - 20 h 00 | Robert Brannigan |
| Fertility preservation in boys and male adolescents | 07/01/2027 | 18 h 00 - 19 h 00 | Rad Mitchell     |
| Testicular tissue transplantation                   |            | 19 h 00 - 20 h 00 | Christine Wyns   |
| In vitro spermatogenesis                            | 12/01/2026 | 18 h 00 - 19 h 00 | Ellen Goossens   |

## MODULE D / FERTILITY PRESERVATION IN SPECIFIC SITUATIONS

|                                                                                  |            |                   |                          |
|----------------------------------------------------------------------------------|------------|-------------------|--------------------------|
| Social egg freezing                                                              | 02/03/2027 | 18 h 00 - 19 h 00 | Pasquale Patrizio        |
| Fertility preservation in benign gynecologic diseases                            |            | 19 h 00 - 20 h 00 | Kirsten Macklon          |
| Fertility preservation and endometriosis                                         | 04/03/2027 | 18 h 00 - 19 h 00 | Edgardo Somigliana       |
| Fertility preservation in case of targeted therapy                               |            | 19 h 00 - 20 h 00 | Isabelle Demeestere      |
| Fertility preservation in genetic diseases                                       | 09/03/2027 | 18 h 00 - 19 h 00 | Richard Anderson         |
| Fertility preservation in hematologic diseases                                   |            | 19 h 00 - 20 h 00 | Anna Marklund            |
| Fertility preservation in breast cancer                                          | 11/03/2027 | 18 h 00 - 19 h 00 | Michael Grynberg         |
| Fertility preservation in colon rectum cancer                                    |            | 19 h 00 - 20 h 00 | Michael Grynberg         |
| Fertility preservation in cervix cancer                                          | 16/03/2027 | 18 h 00 - 19 h 00 | Jan Persson              |
| Fertility preservation in endometrial cancer                                     |            | 19 h 00 - 20 h 00 | Nadeem Abu Rustum        |
| Fertility preservation in ovarian cancer and borderline ovarian tumors           | 18/03/2027 | 18 h 00 - 19 h 00 | Philippe Morice          |
| Fertility preservation in women with fibroids and adenomyosis                    |            | 19 h 00 - 20 h 00 | Tomaso Falcone           |
| Fertility preservation in prepubertal girls and adolescents                      | 23/03/2027 | 18 h 00 - 19 h 00 | Claudia Massarotti       |
| Fertility preservation in Klinefelter syndrome                                   |            | 19 h 00 - 20 h 00 | Peter Schlegel           |
| Fertility preservation in autoimmune diseases                                    | 25/03/2027 | 18 h 00 - 19 h 00 | Michael von Wolff        |
| Fertility preservation in transgender patients                                   |            | 19 h 00 - 20 h 00 | Kenny Rodriguez Wallberg |
| Cancer during pregnancy: management and implementation of fertility preservation | 30/03/2027 | 18 h 00 - 19 h 00 | Frederic Amant           |

| MODULE E / GENERAL CONSIDERATIONS                                      |            |                   |                                           |
|------------------------------------------------------------------------|------------|-------------------|-------------------------------------------|
| Unmet needs in ovarian tissue cryopreservation and transplantation     |            | 18 h 00 - 19 h 00 | Dror Meirow                               |
| Oncogenetic and impact on fertility preservation                       | 01/04/2027 | 19 h 00 - 20 h 00 | Matteo Lambertini                         |
| Long-term outcomes of male fertility preservation                      |            | 18 h 00 - 19 h 00 | Nathalie Rives                            |
| Long-term outcomes of female fertility preservation                    | 06/04/2027 | 19 h 00 - 20 h 00 | Anna Fagotti                              |
| Obstetrical outcomes after cancer (including pelvic radiation therapy) |            | 18 h 00 - 19 h 00 | Raoul Reulen                              |
| Post cancer fertility preservation                                     | 08/04/2027 | 19 h 00 - 20 h 00 | Ane Gerda Eriksson                        |
| Detection of malignant cells on ovarian tissue                         |            | 18 h 00 - 19 h 00 | Marie Madeleine Dolmans                   |
| PGT-A in oncofertility                                                 | 13/04/2024 | 19 h 00 - 20 h 00 | Glenn Schattman                           |
| Oocyte donation                                                        |            | 18 h 00 - 19 h 00 | Nikos Polyzos                             |
| Sperm donation                                                         | 15/04/2027 | 19 h 00 - 20 h 00 | <a href="#">Paolo Emanuele Levi-Setti</a> |
| Cancer and sexuality                                                   |            | 18 h 00 - 19 h 00 | Aylen Vanessa Ospina Serrano              |
| Legal aspects of fertility preservation                                | 20/04/2027 | 19 h 00 - 20 h 00 | Ido Alon                                  |
| Psychologic aspects of fertility preservation                          |            | 18 h 00 - 19 h 00 | Mariana Moura Ramos                       |
| Ethical aspects of fertility preservation                              | 22/04/2027 | 19 h 00 - 20 h 00 | Guido Pennings                            |
| Surrogacy                                                              |            | 18 h 00 - 19 h 00 | Evelyna Manvelyan                         |
| Patients point of view about fertility preservation                    | 29/04/2027 | 19 h 00 - 20 h 00 | Kim Hulscher                              |
